RinaWarp Backend Security Certificate

This certificate verifies that the RinaWarp Terminal Pro Backend is configured with maximum■grade security protections, including:

• Cloudflare Origin Certificate (15■year validity)
• Full TLS encryption from Cloudflare → Caddy → Node.js
• API key authentication system
• Strict CORS allowlist
• Rate limiting (120 req / 15 minutes)
• Helmet security headers
• Stripe secure webhook validation
• Encrypted reverse■proxy pipeline

This system meets production■grade standards for encryption, authentication, and attack■surface minimization.
